

Series 3500

VINYL REPLACEMENT WINDOWS

 WeatherLok®

Series 3500

Reliable. Beautiful. Clearly Superior.

# Series 3500

## Series 3500 Double Hung

WeatherLok's solid vinyl 3500 double hung offers all the advantages of our other double hung series, plus a welded vinyl frame and sashes for unbeatable strength and seamless beauty. And both frame and sash boast a classic beveled edge that will truly enhance your decor.

### Color Options\*\*

### Grid Options\*\*

- Transferable limited lifetime warranty
- 25-year glass breakage warranty

- Bronze exterior laminate (white interior only)
- Sash Limiter for fall prevention
- Factory applied wrap around foam for enhanced thermal efficiency
- Aluminum charcoal mesh screen\*
- Lifetime glass breakage warranty

# It's More Energy Efficient.

It's what you don't see that makes WeatherLok more energy efficient – the high-performance warm-edge system. The secret is the insulated glass spacer with warm-edge design hidden within the frame of each WeatherLok window and door that keeps heat and cold from passing through the glass panes.

## State-of-the-art glass technology together with the high-performance warm-edge system

makes WeatherLok more energy efficient. One secret is the insulated glass spacer with warm-edge design hidden within the frame of each WeatherLok window and door that keeps heat and cold from passing through the glass panes. Now explore our glass options below.

*In the summer, Low-E glass reduces heat gain from the sun to help keep homes cooler.*

*In the winter, Low-E glass lets the warm, solar rays in while blocking the heat in the home from getting out.*

**Low-E Glass** This gives you better insulation, less condensation and greater energy savings all year.

**Low-E Glass with Argon Gas** This is our premier choice for ultimate thermal efficiency. Argon gas forms an invisible blanket between glass panes and creates a buffer against outside noise. The window unit is super-tight and perfect for cooler climates.

**Ultra Low-E Glass with Argon Gas** Windows with this optional glass treatment offer superior thermal performance by combining three layers of silver coating with the insulating power of argon. This glass option is designed to meet stringent energy code criteria anywhere low thermal numbers are desired.

WINDOW CONFIGURATION / GLASS TYPE	U-FACTOR
3500 Single Strength with Low-E glass	.34
3500 Single Strength with Low-E glass and Argon Gas	.31
3500 Single Strength with Ultra Low-E glass and Argon Gas	.31
PVC Double Hung with Low-E and Argon Insulated Glass	.36
Wood Double Hung with Dual Glaze Clear Glass	.45
Single Pane Aluminum	1.18

Note: U-factors listed are with no grid. Values are for single strength glass. The lower the U-factor, the better the windows thermal performance.
